

## **Ancient Weapons Pack “Demo”**

By the SF Audio Guild

Thank you for downloading! If you like this pack we would deeply appreciate a Unity star rating and review with any feedback!

This is a demo version of our “Ancient Weapons Pack”. In the full version of our Pack you will find this description:

“The sounds in This pack have been categorized by action and weapon type. While similar weapon type sounds were made to work with like types, you can mix and match from any category to get exactly the right sound to fit your game. In the “assembled” folder you’ll find our custom, fully assembled attacks which incorporate both swings and Impacts into a single audio file. Bows and H2H are in separate folders.”

Weapon Types:

- \_Axe
- \_Bow
- \_Broadsword
- \_Dagger
- \_H2H
- \_Katana

Actions:

- \_Swing
- \_Miss
- \_Impact
- \_Block
